

Key Responsibilities

- Create, revise, and publish high-quality **Instructions for Use (IFU)** in alignment with current procedures, regulatory expectations, and market needs.
- Ensure documentation complies with **QSR, ISO**, and other internal quality and regulatory standards.
- Coordinate translation activities with external translation agencies and internal stakeholders to ensure linguistic accuracy and timely delivery.
- Maintain adherence to company **style guides**, templates, and quality management systems (QMS).
- Collaborate cross-functionally with teams such as **Product Development, Regulatory Affairs, Quality Assurance, Marketing, and Global Operations** to gather information and validate technical accuracy.
- Drive and manage activities within the assigned area of responsibility.
- Contribute to the **continous improvement** of documentation standards, templates, and processes.
- Support **Deviation, CAPA, and complaint investigations** by providing documentation expertise and contributing to corrective action processes.

Qualifications & Experience

- **Bachelor's or Master's degree** in Technical Communication, English, Journalism, Life Sciences (e.g., Biology, Biochemistry, Molecular Biology), or a related field; equivalent professional experience will be considered.
- **2–3 years of technical writing experience** within the life sciences, medical device, or in vitro diagnostics (IVD) industry.
- **Excellent English**, including speaking, writing, and editing skills.
- Strong understanding of **regulated content development**, including usability, risk communication, and labeling requirements.
- Hands-on experience with **content management systems (CMS/CCMS)**, ideally in **DITA/XML** structured authoring environments.
- Proven ability to manage multiple documentation projects in a **global, fast-paced, and regulated environment**.
- Experience working with **translations and simplified English**.
- Experience with **EU IVDR** documentation requirements.

Preferred Skills

- Proven ability to create **clear, compliant, and user-friendly content** for laboratory technicians, clinicians, and regulatory reviewers.
- **Multilingual skills** (e.g., German, French, Spanish) to support localization and translation processes.
- Experience in use of **reusable content strategies** to drive consistency and efficiency.
- Strong **cross-cultural communication and collaboration skills**, with flexibility to work in a dynamic, global team setting.
- High **attention to detail**, accuracy, and a commitment to continuous improvement.
- Demonstrated **technical curiosity and interest** in understanding complex products and systems.

- Good **collaborator with clear communication skills**.
- Ability to work both independently and in collaboration with others, as well as the ability to handle both small and large tasks.
- Experience with **EU MDR** is an advantage.
