

Highly skilled and detail-oriented Validation and Compliance Lead with 7 years of experience in ensuring the compliance of computerized system with regulatory requirements and industry standards. Proficient in developing and executing validation protocols for a wide range of computerized systems, including software applications, infrastructure qualification, medical equipment devices, Instrument and Equipment's.

Validation lifecycle management, and regulatory compliance within GxP environments. Reviewing and approving change controls, assessing technical feasibility, and ensuring adherence to FDA, EU Annex 11, GAMP 5 guidelines. Experience in evaluating validation deliverables, audit readiness, risk assessment, and maintaining high-quality compliance documentation across enterprise systems.

My expertise includes Quality Management Systems (JIRA, HP ALM, PROTON, Asset Management, Service Now), Waterfall model, Agile Methodology, periodic reviews, and the creation and review of Software Development Life Cycle (SDLC) and Computer System Validation (CSV) artifacts related to IT system applications.

Regulatory Compliance Management (IT- Computer Software Validation-GxP, FDA, IQ/OQ/PQ), Vendor Management, Change Management, GxP system Audit, Defect Management, ALM tools (JIRA, HPALM, PROTON), GAP Assessment, CSHV, ERES, ICHQ9. Provided CSV training to internal stakeholders on validation principles, procedures and best practices.

PROFILE SUMMARY

- Experience in validation practices with good knowledge on 21 CFR Part 11, EU Annex 11, GAMP 5 Guidelines and GxP (GMP, GDP, GCP, GLP) Standards. Extensive knowledge of regulatory guidelines such as FDA 21 CFR Part 11, 21 CFR part 820, ISO 13485, ISO 14971, Annexure 11, and GAMP 5 Strong background in conducting risk assessments, documenting validation activities.
- Authoring Validation Plan / Quality Plan, Validation Report / Quality Report. Developed and executed validation protocols (IQ, OQ, PQ) in accordance with regulatory requirements such as FDA 21 CFR Part 11, EU Annex 11, and GAMP 5 guidelines. Knowledge of all SDLC models for GxP software development (Waterfall, V & Agile).
- Evaluated implementation plans including validation steps, rollback strategies, and risk impact.
- Verified completeness and quality of validation documents (URS, FS, DS, IQ, OQ, PQ).
- Assessed security controls such as access management, patching and end point protection.
- Maintained audit-ready documentation including logs, test results, and validation evidence.
- Supported approval/rejection decisions with proper justification and documentation.
- Collaborated with cross-functional teams (IT, QA, Vendors) to ensure compliance alignment.
- Responsible for CSV documents such as, Compliance Plan, Test Protocol, Migration Test protocol, Test Summary Report, Migration Test Summary Report, Traceability Matrix, Defect report (wherever applicable) and Compliance Summary Report in Asset Management.
- Validation Analyst (CSV Specialist) with experience in URS, FRS and GxP Assessment. Consulting Project team on Quality and Compliance. Responsible for preparation and review of RA, GxP Assessment, URS, DQ, IQ, OQ, RTM, PQ and Validation plan and summary report. Strong cross-functional collaboration with IT, QA, Vendors and users. Experienced in application lifecycle, drafted and reviewed critical validation documents including URS, FS, CS, DS.
- GxP initial assessment. Planned and supported validation activities including IQ, OQ, and PQ in coordination with cross-functional stakeholders. Working on Patching, change control, periodic reviews in operational side. Authoring the documents like validation plan, Risk assessment, RTM, Validation summary report. Providing CSV consultation to the users and Project Team. Experienced in preparation of validation protocol and execution's management, periodic review, and user training. I worked on spreadsheet management tools. Handling the end-to-end CSV process.
- Responsible for Review Feature and Story in JIRA

APPLICATIONS SUMMARY

- LIMS – Labware (Laboratory Information Management System)
- Track Wise Digital (Electronic Quality Management System)
- Val Genesis (eVLMS) 4.0
- Biovia
- Lucine (E-Log Book)
- Veeva Vault
- EDMS (Electronic Document Management System)

- ELMS (Electronic Learning Management System)
- HP ALM, PROTON
- JIRA
- Service Now
- WinKQCL6.3.0
- CoreDox

PROFESSIONAL EXPERIENCE

HCLTech Ltd., Bangalore — Technical Specialist

May 2025 – Present

Key Roles and Responsibilities:

- Successfully validated and implemented iContract Management application to client Sandoz.
- Successfully validated and Implementation Bio-Lendava application to client Sandoz.
- Authoring Validation Plan / Quality Plan, Validation Report / Quality Report.
- Developed and executed validation protocols (IQ, OQ, PQ) in accordance with regulatory requirements such as FDA 21 CFR Part 11, EU Annex 11, and GAMP 5 guidelines.
- Performed compliance review of validation deliverables to ensure adherence to organizational standards.
- Participating in change control review and approval process using ticketing systems.
- Validation Plan, IQ/OQ/PQ Protocols, Data Migration Plan, Application Security Test Plan, BCP/DR Plan, Service Transition Plan.
- Data Migration/Conversion – Directed validation of Data Conversion & Migration Plans/Reports, ensuring data accuracy, completeness, and Part 11 controls across legacy-to-target transitions with discrepancy rate and 100% reconcilable lineage.
- Conducting tollgate review with project stakeholders and performing key role in Functional risk assessment, following risk-based approach for testing activities. FEMA and CSA models.
- Collaborated with cross-functional teams, including IT, quality assurance, and regulatory affairs, to ensure alignment and successful validation of computerized systems.
- Responsible for the deviations, change controls during IQ, OQ, PQ of applications.
- Responsible for periodic review of applications and Event based qualification.

Lyrus Life Sciences Pvt. Ltd., Bangalore

Sep 2023 – Apr 2025

Key Roles and Responsibilities:

- Business Process Owner for Quality Control (QC) applications, responsible for end-to-end lifecycle management and ensuring compliance with GxP regulations.
- Review and approval of key validation documents including URS, FS, CS, DS, and GxP assessment reports.
- Preparation, execution, and continuous maintenance of Risk Assessments and Requirements Traceability Matrix (RTM).
- Planning and providing execution support for Computer System Validation (CSV) activities such as Installation Qualification (IQ), Operational Qualification (OQ), and Performance Qualification (PQ).
- Coordination of OQ activities with IT teams and PQ activities with business stakeholders to ensure seamless validation execution.
- Managing Effect Management, Deviation Management, and Change Management processes in accordance with quality guidelines.
- Delivering training to business teams and end users on QC applications and validated systems.
- Hands-on experience working in Agile methodology for both GxP and non-GxP applications.
- Conducting periodic reviews of validated applications to maintain ongoing system compliance.
- Expertise in Confluence and Jira for Agile project collaboration and documentation.

Stelis Biopharma Ltd., Bangalore

March 2022 — September 2023

Key Roles and Responsibilities:

- Experienced in User Requirement Specification (URS), Functional Requirement Specification (FRS), and GxP

impact assessment for regulated systems.

- Consulted with project teams to ensure Quality and Compliance alignment throughout system implementation.
- Responsible for preparation and review of core CSV deliverables, including: Risk Assessment (RA), GxP Assessment, URS, DQ, IQ, OQ, PQ, RTM, Validation Plans, and Validation Summary Reports.
- Demonstrated strong cross-functional collaboration with IT, QA, vendors, and business users to ensure seamless validation processes.
- Hands-on experience in application lifecycle management (ALM), including periodic review, change management, and user training.
- Worked on spreadsheet validation and management tools, ensuring compliance with GxP and data integrity principles.
- Managed the end-to-end CSV process, from planning to execution, documentation, and approval.
- Played a key role in functional risk assessment, applying risk-based testing approaches using FMEA and CSA (Computer Software Assurance) models.
- Reviewed Test Cases, Test Runs, Test Plans, and Test Reports to ensure completeness, accuracy, and compliance with validation procedures.

Biocon Biologics India Ltd, Bangalore

November 2019 — March 2022

Key Roles and Responsibilities:

- Drafted, reviewed, and approved key validation deliverables including URS, FS, CS, DS, and GxP initial assessments in alignment with regulatory and quality standards.
- Planned, executed, and supported validation lifecycle activities—IQ, OQ, and PQ—in close collaboration with cross-functional teams and business stakeholders.
- Performed operational activities such as system patching, change control management, and periodic reviews to ensure continuous compliance and system integrity.
- Authored essential validation documents including Validation Plans, Risk Assessments, Requirements Traceability Matrices (RTM), and Validation Summary Reports (VSR).
- Provided Computer System Validation (CSV) consultation and guidance to end users, project teams, and quality departments to ensure adherence to GxP and data integrity principles.
- Experienced in developing detailed validation protocols and executing them with thorough documentation of objective evidence and deviations.

Mylan Laboratories Ltd, Hosur

November 2014 — November 2019

Key Roles and Responsibilities:

- Executed instrument and equipment qualification activities (IQ, OQ, PQ) in compliance with GxP and regulatory requirements.
- Prepared, reviewed, and executed qualification protocols and reports for laboratory instruments.
- Supported Computer System Validation (CSV) activities for laboratory systems, including documentation review and participation in validation execution.
- Performed software/system validation activities in alignment with regulatory standards.
- Authored and reviewed SDLC validation documents such as validation plans, protocols and reports.
- Participated in testing of GxP systems and ensured compliance with internal quality standards.
- Collaborated with cross-functional teams (QA, QC, IT) for successful qualification and validation activities.

EDUCATION

- Master of Science, Vysya College, Periyar University, Salem (2007-2009).
